From country 2 [ITALY]:	37
From country 3 [SPAIN]:	8
From country 4 [UK]	2
Total number of participants:	307
From total number of countries:	4
Description	
<i>Provide a short description of the event and its activities.</i>	
The event took place throughout the entire day and brought together around 307 international participants, including teams from the municipalities of Arcos de Valdevez, Caminha, Melgaço, Monção, Paredes de Coura, Ponte da Barca, Ponte	

de Lima, Valença, Viana do Castelo, Vila Nova de Cerveira and Tomiño. In addition to these municipalities, the APPACDM of Viana do Castelo also participated, reinforcing the inclusive nature of the initiative. The programme was designed to align directly with the objectives of the SCORE project, which aims to promote the physical and mental well-being of citizens, strengthen European identity, encourage social inclusion and foster interaction between participants from different backgrounds through sport.

The training activity was opened by a welcome speech of Tomino and Vila Nova de Cerveira Mayors and by a representative of the Municipality of Cesena. In this context, the sports activities carried out during the day – volleyball and basketball in the morning and Boccia in the afternoon – were selected to stimulate physical activity, promote teamwork and ensure the participation of people of different ages and abilities, contributing to the development of social skills such as cooperation, communication and group cohesion. The Boccia session reinforced the project’s commitment to inclusion, as it is a modality accessible to participants with different levels of mobility, ensuring that everyone could take part fully and equally, in line with the project’s principle of removing barriers and promoting equal opportunities.

Alongside the sports activities, a European Union information tent was available throughout the day, playing an essential role in meeting the project’s objectives related to strengthening European identity and bringing citizens closer to EU values. Through quizzes, games and riddles on European topics, participants engaged with relevant information about the history, functioning and fundamental values of the European Union in an informal and accessible way. This educational component, integrated into the agenda in a playful manner, helped increase knowledge about the EU, reduce distant or negative perceptions and promote moments of interaction between participants from different municipalities and countries. At the EU corner there were opportunities to talk and discover the good practices of cooperation and integration between Tomino and Vila Nova de Cerveira. The constant exchange between diverse groups, including the presence of APPACDM participants, further reinforced the intercultural and inclusive character of the event, contributing to the creation of a space for dialogue, sharing and coexistence that lies at the heart of the SCORE project’s mission.

COMMUNICATION REPORT

MUNICIPALITY: TOMIÑO

PIC: 936705818

Description

Comprehensive communication strategy was implemented to promote the SCORE project and the OLYMPICS4ALL event, using both digital and traditional media channels. This included the publication of news articles on official municipal websites, press releases shared with regional media, and active dissemination through social media platforms such as Facebook. The content highlighted the objectives of the project, the international participation, the inclusive dimension of the activities (notably the participation of APPACDM), and the contribution of sport to strengthening European identity and cross-border cooperation.

In addition, online articles and institutional pages provided detailed coverage of the event, ensuring visibility at local, regional and cross-border levels (Portugal, Spain and Italy). These actions contributed to raising awareness of the project, engaging citizens and reinforcing the visibility of EU-funded initiatives.
