## OBJECTIVE

The project “Cesena Città Globale” aims to raise awareness among the local community, and young people in particular, of the values of peace, multiculturalism, solidarity among peoples and the protection of human rights, in order to prevent and combat discrimination.

Through non-formal education, the project aims to promote a global approach to contemporary challenges among the younger generations. The training programme will be divided into four workshops, involving students enrolled in middle schools in a process that will enable them to understand what it means to be global and sustainable citizens, to become aware of the need to address global threats to peace and human rights, and to adopt a non-violent approach to conflict management based on their own daily experiences and within their respective communities.

## ACTIVITIES

- Educational programme in lower secondary schools:** Four workshops will be held in lower secondary schools in Cesena. The workshops will address the following topics: 1) think globally, act locally; 2) reading about war to learn about peace; 3) I Care: for an ethic of responsibility; 4) Creative laboratory: actors and actresses on the global stage.
- Final event:** presentation to the public in the form of a theatre production by the young people involved.

- Communication activities:** creation and distribution of a video/documentary film about the workshops and the theatre production, available on the official channels of the Municipality of Cesena and the schools involved.

## EXPECTED RESULTS

The project will promote educational initiatives that foster a culture of peace, respect and active citizenship.

The project will provide students with tools to deal with conflict constructively, develop emotional and interpersonal skills, value diversity and promote dialogue.

The project will create a more inclusive and peaceful school environment, where young people can feel listened to, valued and part of a community.
